

TriNet Medical

Medication and Immunization Inventory Tracking Solution

Founded in 2009, TriNet Medical's cloud-based SRX software tracks clinic-administered medications, immunizations, COVID-19 test kits, DME and all other inventory in real-time.

Why TriNet Medical?

- **Real-Time Inventory Tracking**
 - Utilizing manufacturer's barcode or custom labels generated by the SRX software
- **Increase Practice Efficiency**
 - Eliminate manual data entry and paper or excel inventory tracking
- **EMR/EHR Integration Capabilities**
 - Stand-alone workflow available for non-EMR applications
- **Detailed Reporting Features**
 - Inventory Status, Expired Inventory, Usage Details filtered by date, location and source
- **Key Compliance Data Points**
 - Real-time usage data required for HRSA 340B compliance and state registry records
- **Patient Safety Features**
 - The SRX software will alert your staff when an expired or recalled item is scanned
- **Eliminate Waste**
 - Real-time monitoring avoids duplicate orders and obsolete or expired inventory
- **Proven Administrative & Clinical ROI**
 - Medication tracking systems dramatically impact staff productivity, costs and patient satisfaction
